Your Intelligence Is Your Advantage

Why the DMS Matters More Than Ever in 2026

NetDocuments

Simply Intelligent

Advantage

Why are we here?

Save time

Reduce
administrative
burden

Automate low-
value tasks

Why are we here?

Save time

Increase
per-partner profits

Combat brain
drain

Adapt to changing
business model

Reduce
administrative
burden

Support AFA,
profitably

Grow practice
strategically

Adapt to changing
culture

Automate low-
value tasks

Turn loss leaders
into profit centers

Manage change
effectively

Adapt to changing
competitive
pressures

Attract top talent

Retain talent

Support job
satisfaction

Adapt to changing
client expectations

Why are we here?

Deliver impeccable work product

Provide unmatched client service

Deliver superior client value

This is why we're here

Centralise and activate **organisational intelligence**
Provide the tools needed to **turn intelligence into action**
Connect to **outside intelligence** and specialized tools

All to provide professionals with an
unbeatable **advantage.**

All your intelligence, activated
and in one place

Their intelligence and tools
(in multiple places)

The image features three keys arranged diagonally across a background with a blue-to-purple gradient. The keys are semi-transparent, allowing the background colors to show through them. The top key is on the left, the middle one is in the center, and the bottom one is on the right. Each key has a circular head with a small hole and a rectangular blade. The text 'Key Capabilities' is overlaid in the center in a large, white, sans-serif font.

AI Landscape: Assistants, Apps and Agents (oh my!)

Basic Tools

- OCR
- ML-based email filing

Advanced Tools

- AI assistants
- Document and workflow automation (traditional + AI)

Background Tools

- Automations that run in the background (e.g., automated document profiling)

Autonomous Tools

- AI agents
- Skills (e.g., search, document editing, data extraction)

Agentic Example: Editing Tool

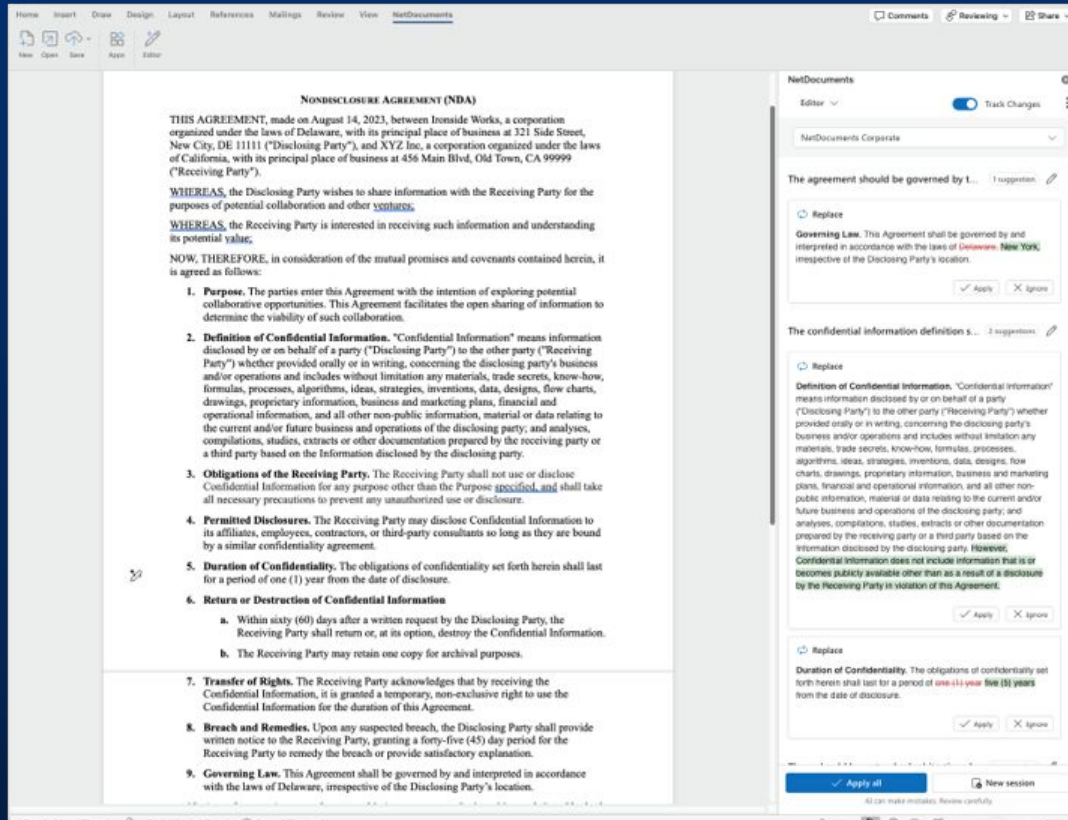

The screenshot displays the NetDocuments web application interface. The main document area shows a "NONDISCLOSURE AGREEMENT (NDA)" with several paragraphs of text. On the right side, a sidebar titled "NetDocuments" contains an "Editor" section with a dropdown menu set to "NetDocuments Corporate". Below this, there are four "Instruction" boxes, each with a trash icon and a text area for editing. The instructions are:

- Instruction 1:** The agreement should be governed by the laws New York.
- Instruction 2:** The confidential information definition should exclude any disclosed information that is already available publicly. Also, the obligation to keep things confidential should last for at least 5 years.
- Instruction 3:** There should be a standard arbitration clause and severability clause.
- Instruction 4:** Modify what disclosure are allowed by limiting it to employees only.

At the bottom of the sidebar, there is a "Submit" button and a note: "Suggestions apply to selected text only".

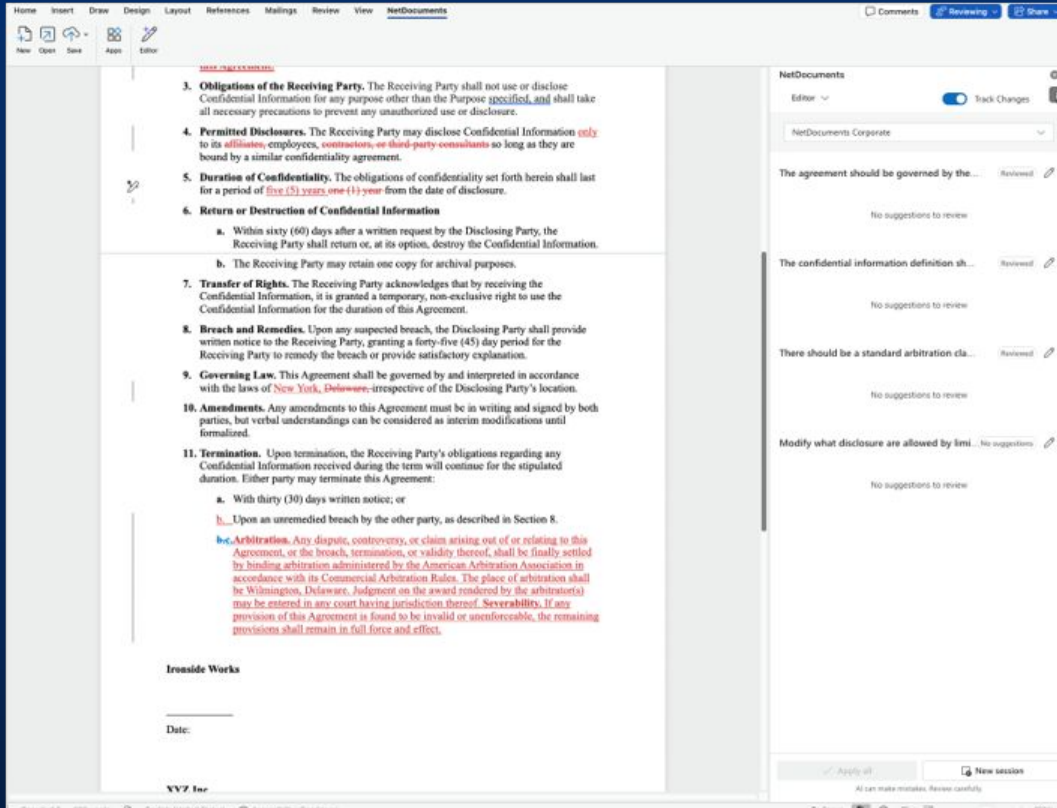

- Natural language instructions
- Simple or complicated
- Single or multiple
- Short or long, complex documents

Agentic Example: Editing Tool

- Agent delivers recommendations
- Accept, reject or revise

Agentic Example: Editing Tool

- Edits applied as tracked changes directly in Microsoft Word

Agentic Example: A New Way of Searching

Untitled Thread

▼ **Searching documents** Searching for 'taiwan hospitality zoning hotel agreement zoning restrictions'

● **Fetching document** Fetching document 'ImperialGardenResortInc_20161028_DRS (on F-1)_EX-10.13_99...'

● **Evaluating hospitality zoning**
I'm looking at a document discussing various aspects of land use, including environmental impact assessments and green cover rates. It doesn't directly mention "zoning restrictions," but it talks about changing land use, particularly for hospitality in Taiwan. The user asked about agreements concerning this zoning. We have an outsourcing contract relevant to development planning, which does consider the zoning processes. I'll summarize the key zoning factors that have been taken into account for that contract.

● **Summarizing zoning considerations**
I'm going to summarize the key zoning restrictions that were taken into account, which include changes in non-urban land use, zoning/category changes, and environmental impact assessments. There's also important focus on soil and water conservation, green cover calculations, and disaster prevention facilities. Additionally, I should look at permits like construction licenses and reviews by authorities. It might be helpful to search for more agreements related to Miaoli and resort developments in Taiwan too!

● **Searching documents** Searching for 'Miaoli Royal Resort zoning non-urban land usage Taiwan agreement' I'm thinking it might be helpful to search with broader terms like "Taiwan hotel lease zoning" or "hospitality Taiwan lease zoning clause." Using specific combinations could lead to more relevant information. I'm curious about what I might find that pertains to lease agreements in Taiwan's hospitality sector. This avenue could be promising! Let's explore those queries and see if more targeted results emerge.

● **Searching documents** Searching for 'Taiwan hotel lease zoning clause'

Yes. We have an outsourcing contract for the Miaoli Royal Resort Hotel (Miaoli County, Taiwan) that expressly contemplated zoning and land-use compliance steps [1].
Key zoning/land-use restrictions and approvals addressed:

- Change of land-use zoning and category, including conversion of non-urban land usage and completion of the land-use change process [2].
- Environmental Impact Assessment (
